50 YEARS OF SKYLIGHT EXCELLENCE

Contents

From the brand you trust. Introducing:

Black Frame FCM Skylights

20 Year Limited Warranty

Back to Black: The Iconic Colour Returns

In 1999, we made history as the first skylight manufacturer to bring a black frame skylight to the Canadian market. Over the years, the FCM has evolved with changing colour trends, but some classics never fade. We're proud to reintroduce the original, iconic matte black frame colour as an option to our most popular FCM sizes. Timeless... Bold... Back to black.

Add Skylight Shades

Add on a solar-powered skylight shade to provide light control while improving the skylight's energy efficiency!

Room-darkening
Unique honeycomb structure adds an extra layer of fabric to block bright sunlight.

Light-filtering
The single-pleated shades softly diffuse natural light, helping prevent glare.

VELUX Recommended. VELUX recommends 5° slope for drainage. Measurements provided allows for a 1" tolerance between outside curb and maximum skylight frame.
[1] ComfortPlus glass (Code 04) is recommended for overhead applications and is typically the minimum requirement for building code in most regions across Canada.

Deck-Mounted Skylights

Explore our range of classic deck-mounted skylights, including solar, electric, and manual versions. Deck-mounted skylights attach directly to your roof with no need for a curb, resulting in a quick, seamless, and watertight installation.

Flat Roof Skylights

Designed for homes with flat or low-slope roofs, VELUX Flat Roof Skylights transform any space with natural light. The innovative design of these skylights lets in more daylight, easily sheds rainwater, and stands out as a modern addition to roof surfaces.

Solar Skylight Shades & Manual Roof Window Shades

Solar powered shades add the ultimate functionality to skylights. Preinstalled shades dramatically improve energy efficiency and give you control over the amount of light in your home. Use the included Wall Switch to easily open and close your shades, or upgrade to our new Intelligent Touch Remote for even smarter operation.

Complete the look of your roof window with stylish, manually-operated roof window shades! Available in a variety of styles and colours to match your decor, roof window shades easily glide up and down to let in just the right amount of light for your space.

Room-Darkening Double-Pleated

- Specially designed to convert day into night by blocking out even the brightest sunlight
- Solar skylight shades are sustainable and easy to use as they are powered by the sun and operated via a wireless wall switch
- Manual shades available for roof windows*

In-Stock [1]

1045 White

Unique honeycomb structure adds an extra layer of fabric to block bright sunlight.

Special Order [2]

1047 Charcoal	1049 Golden Beige	1156 Blue	1165 Light Brown	1166 Ivory

[1] **In-Stock:** Available for factory installation when skylight and shade are purchased together, 3-5 business days. Custom sizes must be placed as special order. Roof windows not eligible for factory installation. [2] **Special Order:** Not available for factory installation. Shades ship separately from your skylight, 4-6 week lead time.
* Manual shades are available in all colours and styles for VELUX Roof Windows, see page 14.

Simple control of all VELUX skylights and shades with one remote.

We believe it should be easier to create your perfect home environment with VELUX skylights and shades. Now, with VELUX Touch, you only need to reach for one remote to take control of every skylight and shade you install. Talk about indoor comfort right at your fingertips!
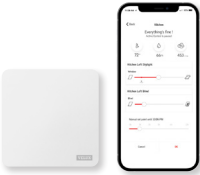

· Remote operation in room where your skylights are installed
· Operate multiple products at once
· Group skylights and shades to operate together
· Set the ventilation timer for regular automated home airing
· Lock home option to securely close all your skylights automatically
· Preset shade and skylight positions for even easier operation

The Touch remote controls both skylights and shades, featuring ventilation timing and programmable presets.

Remote Comparison

|	VELUX Wall Switch	VELUX Touch	VELUX App Control	VELUX ACTIVE
	For customers that want basic and simple benefits, and no smartphone control.	For customers that wish for more benefits and smartphone control, without full automation of products.		For customers that wish to see insight into air and temperature statistics of their home and improve it through automatic ventilation and heat control.

- Angled dome is ideal for south-, west-, and east-facing roofs
- Parallel design to blend with roofline

TMF (flexible) **/ TMR** (rigid)
Pitched
- Raised dome allows for consistent light distribution throughout the day
- Provides straighter tube run through most roof pitches

TCR
Curb-Mount
- One-piece metal, curb-mounted flashing
- Ideal for flat or low slopes as well as tile or metal roof materials

TLR
Low-Profile
- Low profile glass design for a sleek appearance
- Low profile glass is ideal for south, west and east facing roof

Accessories:

Ceiling Rings and Frosted Diffusers

Frosted (Standard) · Micro Fresnel · Triple Wave · Brushed Metal · Prismatic · Neutral Light
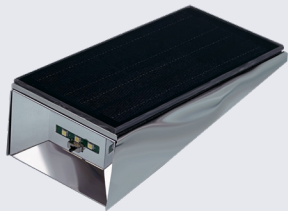

Electric Light Kit   Energy Kit

Other Accessories: Additional rigid tube sections and elbows.

Add a Night Light!

Designed to fit inside the rigid tube of a VELUX SUN TUNNEL® skylight, the **VELUX Solar Night Light** gives off a soft, soothing glow from above when natural light isn't available.

SUN TUNNEL® Skylights

Adding SUN TUNNEL skylights is a cost-effective way to add natural light to areas that need a brighter, more vibrant appearance. Their low-profile design creates a sleek appearance on any roofline, and their pre-fabricated light tube makes them quick and easy to install. Not to mention, they come with a 10-year tube warranty.

The VELUX Skylight Guarantee

20 Year **Limited Warranty** Page 22

Three patented layers of water protection work together to ensure your VELUX skylight will hold up in all weather conditions.

Deck-Mount

Curb-Mount

① **Pre-Attached Seal**
Pre-attached deck seal (deck-mounted) or gasket (curb-mounted) provides a tight seal for leak-proof installation.

② **Adhesive Underlayment**
Adhesive underlayment for secondary water protection against the harshest weather conditions.

③ **Engineered Flashing**
Engineered flashing for easy installation and primary water protection.

Types of Installation

When it comes to skylights, there are two preferred installation methods designed for the Canadian climate. To know which installation is right for a home, a skylight installer or roofer will evaluate the home's roof pitch, roof material, ceiling type, and whether this is a replacement job or a new cut-in. But whatever the method, you're installing the same great skylight that brings in plenty of natural light and fresh air!

Deck-Mounted Skylights

14° - 85°
3:12 - 137:12

Deck-mounted skylights allow your skylight to have a low profile on your roof and create an energy-efficient installation. With this installation, your skylight is nailed directly to the roof-deck. Deck-mounted skylights are ideal for new construction homes or for brand new cut-in skylights.

Curb-Mounted Skylights

0° - 60° [1]
0:12 - 20:12

Curb-mounted skylights are the most common installation preference in low-pitch or flat-roof situations. The "curb" is a frame built mostly of two-by-fours that are attached to the roof. The skylight is then installed on top of the curb. You can imagine it as a shoebox: the curb is the box and the skylight is the lid.
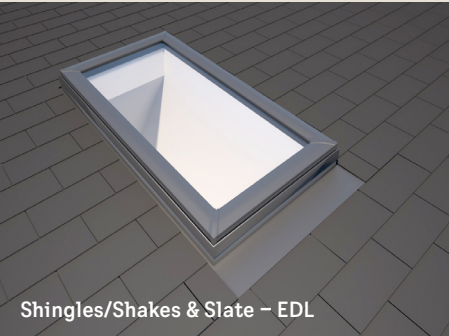

[1] VELUX recommends 5° slope for drainage.
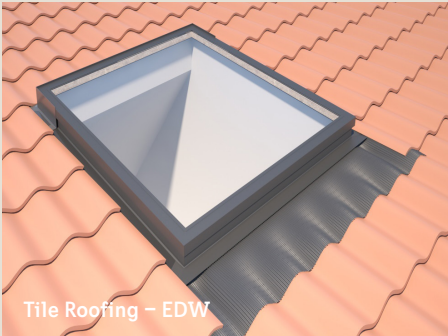

Flashing Systems

VELUX Skylight Flashing Kits are a crucial part of our complete system designed to shed water without relying on sealants that can break down over time. No matter the scope of your project, we offer a variety of skylight flashing systems to ensure a weather-tight fit for virtually all roof types and slopes so you can easily install the skylight of your dreams.
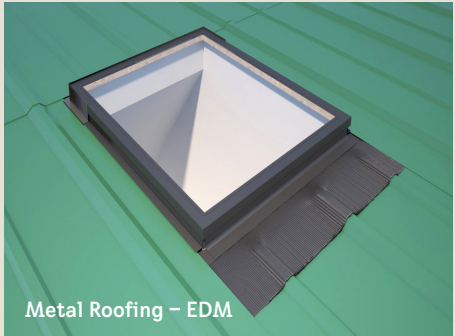

Deck-Mounted Flashing Systems

Each of our deck-mounted flashing systems is made up of a pre-attached deck seal, adhesive underlayment, and engineered flashing. They attach directly to your roof deck and interweave with the roofing material to ensure your VELUX skylight will hold up in all weather conditions.
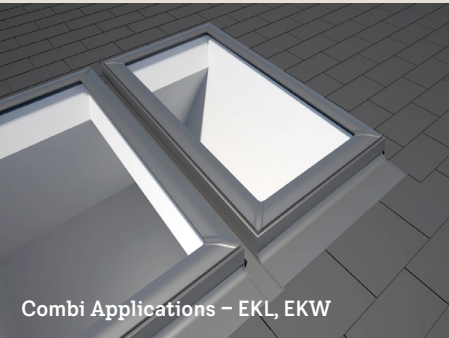

Shingles/Shakes & Slate – EDL
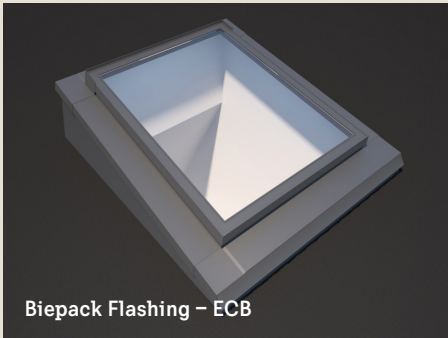

Tile Roofing – EDW

Metal Roofing – EDM
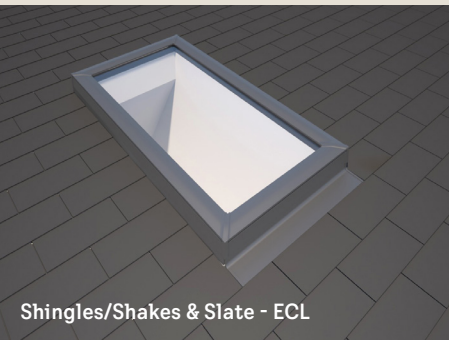

Combi Applications – EKL, EKW

Biepack Flashing – ECB

Curb-Mounted Flashing Systems

VELUX curb-mounted skylights have a pre-attached skylight gasket, which provides a tight seal between the site-built curb and skylight. When combined with our curb-mounted engineered flashing and adhesive underlayment, they create a seal to ensure your VELUX skylight will stand strong in all types of weather.

A Skylight for Every Ceiling

Flat, Attic, Cathedral, Vaulted

Have you considered installing a skylight, looked up at your flat ceiling, and thought that there's just no way? You're not alone! One of the most common misconceptions about skylights is that they can only be installed in homes with vaulted ceilings. But we're here to tell you that's not the case.

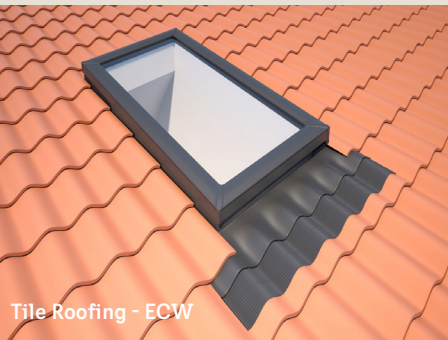

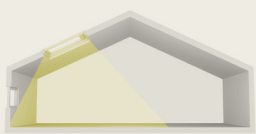

Flat Ceiling
If you have flat ceilings, once your skylight is set outside, your installer will construct a drywall light shaft inside. This shaft directs daylight to the room below while hiding the attic space between your ceiling and roof.
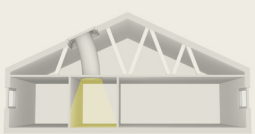

Cathedral Ceiling
The advantage to cathedral ceilings during skylight installation is that without attic space between the roof and your home's interior, there's no need for a light shaft. So, once your skylight is installed, the work's all done.
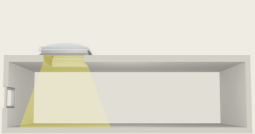

Vaulted Ceiling
Although similar to a cathedral ceiling, vaulted ceilings feature a single sloping slide or arched slope. This style may require a light shaft to be created between your ceiling and roof for the skylight.

Attic
Even if your attic has obstacles like HVAC units, you can still add natural light to your home. SUN TUNNEL® Skylights fit between skylights and SUN TUNNEL® skylights. Depending on your attic space, a small light shaft may be needed to complete the installation.

Flat Roof & Ceiling
Like a cathedral ceiling, flat ceilings under flat roofs can easily accommodate both skylights and SUN TUNNEL® skylights. Depending on your attic space, a small light shaft may be needed to complete the installation.

Choosing the Right Skylight Glass

Local Building Code
Ensuring your skylight meets your **local building code*** is most important when choosing the right glass. Laminated glass is required to meet most building codes in Canada for overhead skylights. Please check with your local building code.

Energy Skylight Series
For customers interested in energy efficiency, VELUX has the widest selection of in stock Energy Glass options. VELUX offers Energy Star® certified skylights and the VELUX Energy Series, delivering the most energy efficient glass options in the industry.

VELUX Glass
VELUX glass has an advanced triple Low-E protective coating, dual sealed and injected with Argon gas that provides maximum daylight and heat control for year-round comfort and energy savings. All glass offers some degree of protection from heat loss & gain, fading and sound.

* Laminated glass is required as a minimum by local building code in most areas across Canada. Please consult your local code authority to ensure exact compliance with your specific application.

Energy Star® and Limited Warranty

Energy Star for skylights

Canada has adopted a simple, single zone criteria for Energy Star rating.

VELUX has the best selection of Energy Star certified skylights and SUN TUNNEL® Not only do we have products that meet Energy Star to save your clients money but they are all rigorously tested to perform in the harshest and most extreme climates. For specific Energy Star by product please go to the Product and Pricing Guide. Scan QR code on the front cover to access.

All Energy Star certified skylights are required to have a maximum U-factor value of 2.29 (metric) or 0.40 (imperial) and meet factory inspections. Energy Star certified skylights are more energy efficient than what most local building codes require.

VELUX also has the **VELUX Energy Series** 🔵 with products that have extremely low performance U-values.

🟦 Zone 1
Effective January 2020

Notice

All glass may be subject to unexpected and spontaneous breakage in rare circumstances due to imperfections in the glass that are undetectable during the manufacturing and inspection process by the manufacturer of the glass and VELUX. VELUX offers the choice of laminated or tempered glass skylights. Laminated glass is a combination of two or more glass sheets with one or more interlayers of plastic (PVB) or resin. In case of breakage, the interlayer is designed to hold the fragments together. Tempered glass does not contain an interlayer to hold the fragments together. Instead, tempered glass is designed to break into small, pebble-like pieces. When tempered glass breaks, pieces of glass come loose and may strike an individual. Consult local regulations and/or building material consultants to determine which type of glass is right for you or if laminated glass is required in your application.

The pricing listed is suggested retail, dealer may sell for more or less. Shipping to the dealer is included on all skylight, SUN TUNNEL® skylight and roof window orders. Shipping is excluded on commercial skylight orders. All other orders are subject to a $20 freight charge.

Virtual Design Consultation

Book your Free 30-Minute Online Skylight Planning Appointment

Let us help you transform your space into your favourite place! Whether you are replacing your skylight, building a new home, or adding a new skylight, we can help jump-start your daylighting project!

Our VELUX Daylight Experts can help you determine which product best fits your needs and connect you with a VELUX Certified Installer.

Our virtual planning consultation lasts about 30-minutes, so you can attend the online appointment right from the comfort of your home and show us exactly where you would like to add or replace your skylight.
